

An industrial trip was organized on February 18, 2025, for 120 students of the 5th, 6th, 7th, and 8th semesters. Students visited Netsol Software House, Enablers, and Devsinc, gaining practical exposure to software development and business strategies. They also enjoyed a recreational visit to Ice Land, Bahria Town, which helped in team bonding. The trip successfully bridged the gap between theoretical knowledge and real-world industry practices.
